

JIMMIE CREEK: RUN-OF-RIVER EXPANSION

- Location: 80 km NE of Powell River in Toba Valley
- Plant capacity of 62 MW
- 40 year Energy Purchase Agreement (EPA) with BC Hydro
- Construction started in spring 2014
- Adjacent to the existing Toba Montrose facility
- Will use the existing Toba Montrose transmission line

The project consists of a new renewable power facility to be constructed in the Toba Valley on Jimmie Creek, approximately 80 km northeast of Powell River on BC's Sunshine Coast. The powerhouse will connect to the existing 155 km, 230 kV, Toba Montrose transmission line to Saltery Bay, which is the point of interconnection with the BC Hydro system.

When complete Jimmie Creek will have the potential to produce electricity for over 15,000 homes.

The Jimmie Creek project will complement our larger existing Toba Montrose project which has an installed capacity of 235 MW and an annual production of up to 727 Gwh/yr.

What is run-of-river power?

Unlike traditional hydroelectric facilities, which flood large areas of land, run-of-river projects divert a portion of the flow from a river into a pipe called a penstock. The penstock transmits the water downhill to a generating station. The natural force of gravity creates the energy required to spin the turbines that in turn, generate electricity. The water leaves the generating station and is returned to the river.

JIMMIE CREEK CONSTRUCTION MILESTONES

Milestone	Start	Finish
1. Project Mobilization	March 2014	-
2. Camp Construction	March 2014	June 2014
3. Tree Clearing	March 2014	April 2014
4. Road Construction	March 2014	June 2014
5. Penstock Construction	May 2014	November 2015
6. Powerhouse Construction	May 2014	November 2015
7. Intake Construction	June 2014	November 2015
8. Generator Installation and Commissioning	September 2015	August 2016
9. Commercial Operation	August 2016	

EMPLOYMENT INQUIRIES

Unsolicited Employment Inquiries:

Please send all resumes for employment to SNC Lavalin:
employmentjimmiecreek@snclavalin.com

All applicants will receive confirmation of receipt of resumes. Only applicants being interviewed for positions will receive further communication.

First Nations Employment Opportunities:

Please send all resumes to the Klahoose First Nation Employment Coordinator at the Klahoose First Nation:
employment@klahoose.org

Specific Employment Opportunities:

Contractors will notify the First Nation Employment Coordinator and advertise specific position openings in the Powell River Peak, Campbell River Mirror and Campbell River Island Courier newspapers.
